“
Innovate as fast
as we move...

”

Our mission : To provide cities and companies with the most advanced technologies to simplify the development of intermodal & MaaS solutions.

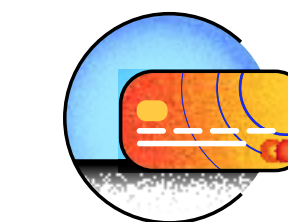

Mobility Marketplace API

With a few lines of code, we offer access to the distribution and reservation systems of a myriad of mobility services, worldwide. Public transports, train, ferry, long distance bus, parking, taxi, PVH, bikeshare, free-floating scooters, motor bike sharing, carpooling, car-sharing, electric charging stations, car rentals, ...

Intermodal Routing API

From planning to timetable consultation, we provide powerful algorithms to deliver the most reliable traveler informations and door-to-door trips. In addition, Our flexible intermodal route planner, perfectly handles interoperability, on a local and national scale.

Centralized payment system

To ensure an end-to-end mobility experience, we provide a payment platform that supports various payment methods. The user pays once , irrespective of the number and the modes of transportation booked.

“ It all started
in 2018, in Lyon... ”

Ex-director of a cab company for 8 years, he was in contact with his customers and their feedback that Laurent got the idea to improve the accessibility of transportation. So he joined forces with Adrien Hugon, ex-CTO of a web and mobile development agency Apps Panel, and Yacine Belarbi, a development enthusiast, to found Lyko together. Their ambition is to become the future « Amadeus » of Mobility.

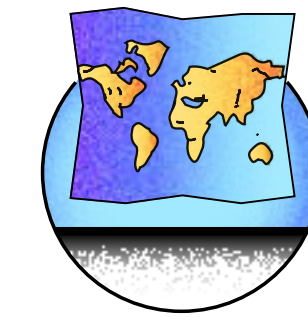

Yacine Belarbi, Laurent Bouzon & Adrien Hugon
Co-founders of Lyko

Today, Lyko is the only technology solution to connect the Mobility World

2 000 +

integrated
mobility services

cities
in the world

**In the
top 100**

startups
to invest in 2020
(Challenges Magazine)

**Selected by
Greater Jakarta**

to accelerate the
development of its
MaaS application

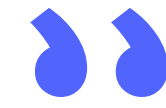

“ A vast network of partners... ”

“It can often take several months before concluding a partnership with a mobility service, then becoming familiar with these databases and information systems, or even integrating payment for these services... Lyko makes the Mobility World easily accessible to ALL innovators”

Laurent BOUZON, CEO & Co-founder of Lyko

“ A technology that interests...”

"Unlike existing Open Source journey planners, our own algorithms allow to process a large volume of data and to plan intermodal trips on a national scale."

Adrien HUGON, CTO et Co-founder of Lyko

MaaS project
Greater Jakarta (Indonesia - 2021)

Feb. 2018

Winner 2018
Digital InPulse

Jan. 2019

Joon (Air France)

Project to offer its passengers the ability to book their airport transfer directly on board the airplanes via the IFE

Dec. 2019

SEAT (Volkswagen)

Contract signed to integrate our APIs in its future intermodal mobile application

Avr. 2021

“ Discover the story of our Co-founders... ”

Laurent BOUZON
CEO

Former high level sportsman (judo), he stopped his studies to concentrate on his passion, entrepreneurship. He created several companies with more or less success: car rental, business services... but his main experience was as manager, for 8 years, of a cab company in Lyon: Taxi au Féminin. One million € of turnover with at its peak a staff of 11 drivers.

Favorite mode of transportation :
The TGV

Adrien HUGON
CTO

Nicknamed the machine, he is a true man of challenge. Nothing resists him. With a strong background in tech, he was successively Project Manager and CTO for Apps Panel (MBaaS). Then he founded Ownie, the wix of mobile apps. Adventure that ended in 2018, year he joined Lyko. Just like Laurent, Adrien is a former sportsman, French Dance Champion.

Favorite mode of transportation :
The hybrid car

Yacine BELARBI
Full Stack Developer

Self-taught, Yacine is probably the most malicious of the team. Indeed, he discovered the code in an unusual way... By hacking the Facebook account of his ex-girlfriend. He then decided to join Simplon to complete his training. Starting at Lyko as an intern, he showed such determination that Laurent decided to make him his associate.

Favorite mode of transportation :
The electric car

"Every morning I wake up with a big smile knowing that I will be sharing my day with such a great team. Today Lyko is a team of ten determined people. I am so proud of what we have achieved in 3 years. It's incredible, and it's only the beginning of a great adventure! "

Yacine BELARBI, Co-founder de Lyko & Full Stack Developer
