## **LYKO integrates more than 30 car rental operators in its API**

**From now on, thanks to Lyko you can integrate on whatever platform the reservation of more than 30 car rental operators. In no time. Lyko permits the access of the data and services of 35 000 agencies through Europe, and a 300 000 available vehicles fleet.**

**Within 2026, the amount of rental cars consumers is estimated to reach around ...**

With a balance sheet of nearly 83 million euros generated for the car rental business at the beginning of 2022, the future looks encouraging, despite the health crisis. The largest operators estimate that the number of users of this rental solution will reach 604.2 million by 2026. These users would generate 70% of the revenues through online booking, despite the sometimes tedious and complicated processes.

### **Lyko API, a simple and efficient integration**

In 5 minutes stop time, the Lyko API permits the reservation of the biggest car renters, passing by Europcar, Avis, Hertz, Sixt, or Enterprise, Budget, Ada and more. Lyko undertakes the most of the work, aggregating and updating the whole data packs of these operators, whether on local, national or international scale. Integrating this car renters API is a springboard in that way, but not only...

### **A single API, a multitude of possible stakeholders**

By supplying the access to more than 2 500 suppliers of mobility (train, public transports, scooters, ferries...) through the world, the Lyko API covers all the needs, from planning door-to-door trips to the booking and payment. It's a tools suite assembling all the necessary functional bricks to set up the best intermodal mobility solution. With that, it's now on possible to start all keys in hand and reinvent the mobility of the future !
